SUBJECT INDEX

A

Abdomen in labor, book review, 1081
Abdominal allergy, 32
Accuracy and precision in clinical pathology, 565
Acetone and diacetic acid in urine, rapid quantitative determination of, 1155
Acetonuria, estimation of acetone and its application to the problem of normal, abst., 388
  occurrence and course of, during pregnancy, abst., 188
Achylia gastrica, etiology and pathogenesis of, abst., 186
Acidosis, a reliable clinical method for estimating, abst., 1168
Acriflavine solutions, neutral preparation of, for intravenous injection, 231
Acute infections, prophylaxis of, 298
Address before the American Society of Clinical Pathologists, 515
Adrenalin, chronic use of, in the treatment of asthma, 1012
Agglutination method, macroscopic of typing blood, 773
  tests, a simple reaction for detecting the binding of agglutinins by difficultly agglutinable suspensions, abst., 1074
    macroscopic a rapid method for the, abst., 1076
Air analysis, contribution of, to the study of allergy, 967
Aldehydes, test for, abst., 91
Alkaloids, morphine and related, 750
Allergens, the nature of, 608
Allergic bronchitis, 943
  conditions, use of filtered air in the diagnosis and treatment of, 963
  disease, nonspecific diagnosis of, 977
  diseases, book review, 606
    clinical use of epinephrin in, 1019
  eczema, 24
  equilibrium, 633
Allergy and epilepsy, 41
  causes for failure in the specific treatment of, 955
  chart illustrating present knowledge of, 1006
  contribution of air analysis to the study of, 967
  in the etiology of disease, 31
  mechanism and terminology of, 905
  rôle of specific and nonspecific factors in, 633
American Association for the Study of Allergy, 806
  Society of Clinical Pathologists, 799, 1088, 1091
    minutes of sixth annual convention, 384
Anaerobes, a new method for the cultivation of, abst., 781
Anaerobic streptococci and puerperal fever, 196
Anemia as a factor in the sedimentation time of erythrocytes, 322
  pernicious, 124, 128
    hemolytic icterus resembling, 1041
  remissions of pernicious, 827
Anesthesia, local, studies in, 281
Angina pectoris, superior cervical sympathetic ganglion, 101
Angioneurotic edema, 33
Animal board, a new, 660
Anions and kations, influence of, on the viability of bacillus coli, 1027
Antigen for use in serum tests for syphilis, 588
Antisterility vitamine fat soluble E, book review, 1169
Aplastic anemia and essential thrombocytopenia, differentiation of, abst., 778
Approved clinical laboratories, 199
Arsphenamine, fatalities following the use of, 345
Arthritis, chronic, classification and treatment of, abst., 499
  deformans, dysentery bacillus in, abst., 775
Artificial respiration apparatus, 655
Aspergillosis of the lungs and its association with tuberculosis, abst., 602
Asthma and hay fever caused by pollen of the paper mulberry, 829
    orris root as a factor in etiology of, 516
  chronic use of adrenalin in the treatment of, 1012
  hay fever, and allied diseases, phosphorus and calcium in, 997
  in children, 67
  pathology of, 921
  patient, mental and neurologic reactions of the, 20
  pollen filters in prophylaxis and treatment of, 59
    in infants and young children, incidence and significance of skin tests in, 949
Asthmatic patient, perennial, subnormal temperature in, 1010
  the potential, 913
Atmospheric pollen and botanic flora on the east shore of San Francisco Bay, 416
Automatic pipette, a new, 681
Automemotherapy, effect of, on blood picture, abst., 600

B

Bacillus acidophilus and B. bulgaricus in human intestine, abst., 499
  coli, influence of anions and kations on the viability of, 1027
  ozena foetidae, perez, and Bacillus proteus in ozena, abst., 691

Bacteria in spinal fluid, incidence of various species of, from cases of meningitis, 547
Bacterial action in pleural exudates, abst., 190
allergic types of asthma, 921
Bacteriologic atlas, book review, 507
Bacteriology, blood work, and animal parasitology, book review, 1171
for nurses, book review, 605
textbook of, book review, 194, 699
Bacteriophage and its behavior, book review, 898
from normal stock cultures, 837
nature of, 992
Bacteriostatic action of gentian violet on colon group, 1122
of the blood, effect of intravenous injections of neutral acriflavine on, 237
Barbital in parathyroid tetany, 732
Basal metabolism, 164
in health and disease, book review, 604
notes on, 265
Basic fuchsin in alcohol, variable partial solubility of, 1052
Bile acids in urine, colorimetric methods for the determination of, 1159
salt hemolysis, differentiation of hepatic and anhepatic jaundice by, 867
Biliary tract disease, studies in, 862
Bilirubin in urine, abst., 295
Bilirubinemia in pregnancy, diagnostic value of, abst., 779
Binocular microscopes, simple hood for use with, 83
Biologic colorimeter, uses of the, as a stand for the hand spectroscope, 1043
Biological relations of optically isomeric substances, book review, 397
Birth injuries to the central nervous system, book review, 1170
Bismuth, effect of, on kidney, abst., 777
Blastomyces, staining the nuclear material in, 1161
Blood agglutination, influence of various factors upon the, abst., 895
calcium estimation, 670, abst., 889
in leprosy, abst., 395
pathologic variations, abst., 89
changes and brain structure, after treatment in general paralysis, 413
counting pipettes, seal for, 86
counts, differential, 366
grouping, a simple method for testing for blood compatibility, abst., 1168
inheritance and medicolegal application, abst., 186
picture in purpura, 303
platelet counts in infants and young children, abst., 198
pressure determinations in rabbits, single apparatus for repeated, 279
sedimentation in carcinoma, abst., 185
in urology, significance of, 776
Blood—Cont'd
serum in disease, a study by means of ultrafiltration of the condition of several inorganic constituents of, abst., 191
stain giving more constant results, 1139
staining of, by Giemsa's method, abst., 290
sugar, new Benedict method for the determination of, abst., 779
transformation of monocytes into fibroblasts through the action of raus virus, abst., 389
typing by macroscopic agglutination method, 773
-urea determinations, Bunsen value in, 668
Body temperature, resistance thermometer for recording, 78
Bone cyst, etiology of solitary, abst., 984
Botanic flora of the east shore of San Francisco Bay, 416
Bottle, etherizing, for experimental work, 1061
Brain structure and blood changes after treatment in general paralysis, 413
Briggs' method for the colorimetric determination of phosphorus, 251
Bromide comparator, LaMotte-Wuth, 495
Bronchitis, allergic, 943
Brown apparatus for colorimetric determination of P_H, 182
Bunsen valve in blood-urea determinations, 668
